CLEANING INSTRUCTION AND MAINTENANCE:

INSPIRE acrylic laminates comes protected with a high-quality protective film which is only removed at the completion of all installation work. After the protected film is removed, there is still presence of solvent from the adhesive coating of the protective film on the surface of high gloss acrylic laminate. An electrostatic charge is built-in and attracts dust onto the surface of the panel.

During this time, the acrylic laminate surface also cures out under the influence of normal air humidity. Under normal circumstances, the 'Curing' process will take approximately 72 hours for the surface to be totally cured. In order to speed up the process, we recommend cleaning the high gloss surface with COLIN glass cleaner and soft micro fiber cloth.

WARNING:

Do not use any of the following cleaning product.

- Alcohol-based cleaners
- Solvent-based cleaners
- Petrol, pinewood or oil based cleaners
- Cloth other than a micro fiber

Treated with a special lacquer coating on the surface, our 6h anti scratch acrylic laminates can bear daily wear & tear.

For ease of Use and Effortless Installation, Our Range of Laminates Have been Developed in A Way to keep them Extremely Light Weight

Our Anti Scratch Acrylic Laminates are Extremely Study and Durable. The Can withstand heavy loads easily

Anti-Yellow UV Resistance

Anti-bacterial and Anti-fungal

Low Porosity Low Water Absorption

Our Laminates are specially treated to ensure they remain termite and borer free for several years

Lots of Range and Huge Collection
